IAD
INTERNATIONAL ARTISTS DOHA
**Annual
Exhibition
2019**

science &
technology

PREFACE

It is an honour and pleasure serving as chairman of International Artists Doha (IAD) in my third year and thus work, experience, learn, stimulate and socialize with a group of highly spirited and artistically very qualified individuals. IAD was established in 2011 by two Dutch artists as a non-profit organisation for national as well as international artists living and working in Doha. We share our experience, contribute to local events, and are present in social endeavours and show-cast our work once a year in an annual exhibition.

It is a pleasure to hold our annual exhibition for the second consecutive year at the W Hotel, Art 29 Gallery, a magnificent place full of magic for artistic showing and public encounters. As science and technology are very present in our life and also play a dominant role here in Doha when looking at the infrastructure development of the city, the outstanding achievements in different fields of scientific and technological strive in the country overall ranging from health over transport to environment and the multitude of teaching institutions of excellence being gathered in Educational City, we have opted for this theme for our annual exhibition.

Art works about science and technology have to do with symbols, achievements in solving problems of the past and the future for human survival and development, the tension between the preservation of the habitat and the intact environment whilst city developments and population growth demand technical and technological solutions.

We hope to offer a contribution to this important topic of discussion while at the same time wishing all visitors and on-line spectators of our art work lots of pleasure in sharing our journey and expressing our gratitude for being with us.

From the heart

Willy Kempel

Chairman International Artists Doha
April 2019 Doha

IAD Committee 2019

Willy Kempel	IAD Chair
Leila Elhaj	Deputy Chair
Mahesh Kumar	Design
